*Applying Fundamentals of Enterprise Solutions Using IBM*

<http://killexams.com/pass4sure/exam-detail/000-013>

- A. IBM Tivoli Federated Identity Manager is an appropriate investment for this customer.
- B. The key technology in any cross-enterprise configuration is enterprise content filtering technology.
- C. Any recommended approach must be based on Worldwide Federated Data Interchange (WWFDI) standards.
- D. They can cover the cross-enterprise case simply by using cross-enterprise options for the IBM Tivoli security products they already have.
- E. The preferred route for addressing secure cross-enterprise (federated) transactions is to base an approach on emerging Web services architecture and standards.
- F. A service-oriented architecture approach allows significant business expansion with relatively minor investment, and securing this architecture in a Web services standards-based fashion is critical to success.

**Answer:** A, E, F

**QUESTION:** 84

An organization requires that all users have anti-virus software installed and active on their respective workstations at all times. However, they find they do not have an automated way to check whether users conform to this requirement. Which IBM Tivoli solution can help the organization automate these checks?

- A. IBM Tivoli Access Manager
- B. IBM Tivoli Identity Manager
- C. IBM Tivoli User Administration
- D. IBM Tivoli Security Compliance Manager

**Answer:** D

**QUESTION:** 85

In a Business to Business (B2B) scenario, what is the primary business goal?

- A. To assure the integrity and availability of critical systems and identities
- B. To provide cost-effective resource utilization and protection of the integrity and availability of disseminated information
- C. To ensure the internal mechanisms of a business interact in a manner that limits liability and expedites production
- D. To facilitate speed of transactions between contractually trusted parties using efficient and secure information exchange

**Answer: D**

**QUESTION: 86**

An IBM customer is interested in knowing more about a specific IBM Tivoli product version before it is officially released to other customers. What do you recommend to the customer?

- A. Redbook residency
- B. Passport Advantage
- C. Early Support Program
- D. Certification Exam Development

**Answer: C**

**QUESTION: 87**

A customer has four different application types:

1. J2EE applications that use J2EE role security model
2. Web applications with heterogeneous administrative model
3. J2EE applications that do not use J2EE role security model
4. Web-Services applications that use WS-Security

Which order of application integration within IBM Tivoli Access Manager and IBM Tivoli Federated Identity Manager results in a faster Return on Investment (ROI)?

- A. 4-2-3-1
- B. 1-3-4-2
- C. 3-4-1-2
- D. 2-3-1-4

**Answer: D**

**QUESTION: 88**

A client has reviewed your cost estimates for an implementation of IBM Tivoli Identity Manager and IBM Tivoli Access Manager. The client requests that you prove the functionality of the products and the value derived within a controlled subset of the client environment. What is this type of implementation called?

- A. Test Plan
- B. Phased Release
- C. Proof of Concept
- D. Standard Implementation

**Answer: C**

**QUESTION: 89**

A client has the following business requirements:

- Reduce the cost of provisioning users onto systems across the enterprise
- Provide single-sign-on across their Web applications
- Provide for cross-corporate, single-sign-on access between them and their Human Resources benefit provider, via their portal

Which IBM Tivoli products would provide the best solution for this client?

- A. IBM Tivoli Access Manager for e-Business, IBM Tivoli Identity Manager, IBM Tivoli Federated Identity Manager
- B. IBM Tivoli Access Manager for e-Business, IBM Tivoli Privacy Manager, IBM Tivoli Federated Identity Manager
- C. IBM Tivoli Access Manager for e-Business, IBM Tivoli Directory Integrator, IBM Tivoli Federated Identity Manager
- D. IBM Tivoli Access Manager for Operating Systems, IBM Tivoli Identity Manager, IBM Tivoli Federated Identity Manager

**Answer: A**

**QUESTION: 90**

Which skills are necessary to implement IBM Tivoli Directory Integrator to synchronize data between different registries and databases?

- A. Java, JavaScript, DSML, SQL, JNDI
- B. C/C++, Perl Script, XSL, SSL, LDAP
- C. Java, JavaScript, HTML, SAML, POP3/IMAP
- D. WS-Provisioning, WS-Federation, SAML, Liberty V1.2

**Answer: A**

**QUESTION: 91**

IBM Tivoli provides the only integrated solution that addresses the four key areas of identity management. Three of these areas are: Identity lifecycle management (user self-care, enrollment, and provisioning); Identity control (access and privacy control, single sign-on, and auditing); Identity foundation (directory, directory integration, and workflow). What is the fourth area of identity management?

- A. Identity creation (how the Identity itself is created)
- B. Identity gestation (development of how an Identity is generated)
- C. Identity deletion (process which outline when/how a user is removed from the environment)
- D. Identity federation (sharing user authentication and attribute information between trusted Web services applications)

**Answer:** D

**QUESTION:** 92

Which IBM Tivoli solution can help increase customer revenue and achieve significant cost savings?

- A. Run partner applications with Tivoli Directory Server
- B. Control workflow across enterprises with Tivoli Identity Manager
- C. Secure interactions with partner websites using Tivoli Federated Identity Manager
- D. Provide an application development platform with Tivoli Access Manager for e-business

**Answer:** C

**QUESTION:** 93

You meet with the customer and compile the following list concerning security:

- customer business requirements
  - immediate business/security needs
  - customer long-term business/security vision
  - customer stated security requirements
- What should also be included in this list?

- A. List of products to be deployed
- B. Government security standards.
- C. Existing change control processes.
- D. Company complete organizational chart.

**Answer:** B

**QUESTION:** 94

You are examining a customer's IT process maturity as it relates to security. You find that the customer has privacy statements on their websites. It appears that only manual processes support these privacy statements. Which process change do you recommend that provides support for the customer's privacy statement?

- A. They need to back up their privacy statements with purpose-based, fine-grained authorization at a data level.
- B. They need to address encryption of data, in order to keep it private, both while stored on disk and while in transit.
- C. They need to back up their privacy statements with server and desktop compliance tools to ensure they meet their privacy goals.
- D. They do not need to make a change since they are making statements to their customers regarding their position regarding privacy.

**Answer:** A
