- D. Check the Registry for the latest schedule information
- E. From a command line run the ps -ef | grep dsms command

Answer: A, B

QUESTION: 95

How can it be determined which volumes are full in an IBM Tivoli Storage Manager (TSM) diskpool?

- A. issue the query volume * command
- B. issue the query stg diskpool command
- C. select View Volumes in the TSM Administrative Center
- D. select View Storage Pool in the TSM Administrative Center

Answer: Pending. Please Send your suggestions to feedback

QUESTION: 96

You have an IBM SCSI attached library with LTO4 tape drives installed. One of the tape drives fails. You call IBM support and they replace the tape drive. What must be done for the drive to function?

- A. Update the drive to view its new element number
- B. Restart the process that was running when the drive failed
- C. Update the drive path to detect the new drive serial number
- D. Restart the IBM Tivoli Storage Manager server

Answer: B

QUESTION: 97

What should you verify before running the audit library LIB1 checklabel=barcode command on your SCSI tape library?

- A. That library phone home mode has not been enabled
- B. That no processes are running or tapes are currently mounted
- C. That at least one tape drive is available for the audit library to use
- D. That the barcode scanner is working properly from the IBM Tivoli Storage Manager Administration Center

Answer: A

QUESTION: 98

Which command is used to display all the administrative schedules defined for an IBM Tivoli Storage Manager server instance?

- A. query events * *
- B. query events * type=administrative
- C. query schedule type=administrative
- D. query associations type=administrative

Answer: B
