- A. Active-Standby
- B. Supervisor Redundant
- C. Hot Standby
- D. Active-Active

**Answer:** D

**QUESTION:** 66

A technician is asked with creating a set of Routing Policies for the organization

- A. A SIP entity must be specified as destination and as an origination point. You must provide the times of day that the policy applies, and a dial pattern or regular expression that the call URI must match
- B. The destination SIP entity can either be chosen specifically, or it may be selected implicitly using a matching expression Multiple times of day the policy is active can be chosen. The policy must have either a dial pattern or regular expression

C. A routing policy MUST specify a SIP entity as a destination, and also a dial pattern which the called party in the SIP message is matched against. Inclusion of a time range, or time range, or regular expression, is optional but recommended since it makes the policy more specific

D. A SIP entity must be specified as an end point, the times of day that the policy applies must be provided, either a dial pattern or regular expression for the policy must be provided

**Answer:** A

**QUESTION:** 67
