**QUESTION: 54**

Which of the following is a significant cause of failure when using the technology-focused approach to BI Application development?

- A. Users often have difficulty understanding new technology.
- B. New technology often contains internal flaws and errors that affect the delivered solution.
- C. The solution is focused on a single subject area.
- D. Developers often focus on just the data.

**Answer: D**

**QUESTION: 55**

Which of the following statements is true about the Waterfall Approach?

- A. The five steps in the process are considered valid for BI software development projects.
- B. Each step is performed in sequence but you return to previous steps at specific points in the development cycle.
- C. It is designed so that requirements that are not discovered in the Analysis step will cascade out during the design phase.
- D. Project management tools no longer encourage the Waterfall Approach.

**Answer: A**

**QUESTION: 56**

While Cognos 8 BI will support any data warehouse design, which of the following designs does Cognos recommend for new warehouse development?

- A. Operational Data Store
- B. Dimensionally Modeled Relational
- C. Normalized Enterprise
- D. Dimensional Bus

**Answer: D**

**QUESTION: 57**

Which of the following statements best describes the Iterative Approach of application development?

- A. A prototype solution is developed after the initial user interviews. This prototype is then used as a basis for refining specific design requirements.
- B. The design step is repeated multiple times before proceeding to the development step. Each pass through the design step further refines the eventual solution.
- C. The solution is developed and delivered to the users. After approximately 2 weeks, the users are interviewed for any missing requirements and any new requirements form the basis for the next iteration.
- D. A prototype is created that addresses 80 to 90% of the business requirements. This is demonstrated to the users and their feedback is used to refine the prototype in subsequent iterations.

**Answer:** D

**QUESTION:** 58

Which of the following issues is Iterative Development specifically designed to address?

- A. The very act of developing a system or solution will change the business requirements.
- B. Users understand their business processes but they don't usually understand application development.
- C. No developed solution will satisfy all users equally.
- D. Users often feel that IT does not understand the business.

**Answer:** A

**QUESTION:** 59

Why should an application's performance be monitored on an ongoing basis after it goes into production?

- A. Initial performance tests are usually too optimistic.
- B. There is little value in performance tests before a system goes into production.
- C. Usage patterns on applications tend to change over time.
- D. New releases of system and application software usually degrade performance.

**Answer:** C

**QUESTION:** 60

After a BI application is placed into production, all of the following are considered part of the process to prepare for the next iteration of the application, EXCEPT:

- A. Record and track enhancement requests
- B. Communicate with users to insure the application is delivering value

- C. Periodically re-apply the V-test model against the developed components
- D. Enhance application documentation to reflect errors and omissions

**Answer: C**

**QUESTION: 61**

Which of the following is the recommended method of implementing a regular backup plan for a BI Application?

- A. Implement a BI application backup plan separate from other production applications.
- B. Back up the production application into the test environment.
- C. Copy the BI application to a duplicate environment.
- D. Integrate the BI application into existing production backup plans.

**Answer: D**

**QUESTION: 62**

Which of the following describes an advantage of using the dimensionally modeled relational (DMR) technique to access a normalized data structure?

- A. Eliminates the need for aggregate tables
- B. Reduces the time needed to fetch the required data
- C. Enables drill up/down functionality in reports and ad hoc queries
- D. Enables creation of IQDs for creating Power Cubes

**Answer: C**

**QUESTION: 63**

Which of the following describes how Cognos 8 works with aggregate aware table in relational data sources?

- A. Cognos 8 can create aggregate aware tables within the database.
- B. Cognos 8 redirects its generated SQL to take advantage of aggregate aware tables.
- C. Cognos 8 does not make any specific adjustments for aggregate aware tables.
- D. Cognos 8 can monitor reports that are run and suggest aggregate aware tables.

**Answer: C**

**QUESTION: 64**

All of the following describe design intent of an operational database EXCEPT:

- A. Record the day to day operations of the company
- B. Maximize the speed of inserts and updates to the database
- C. Enhance reporting through foreign keys and indexes
- D. Facilitate performing specific functional tasks

**Answer:** C

**QUESTION:** 65

Which of the following is a valid strategy for addressing failover for the content store?

- A. Install active and passive instances of the content store.
- B. Install active and passive instances of the Content Manager service.
- C. Take advantage of failover protection in the Applications tier by installing the content store on a server that hosts multiple instances of the report service.
- D. Take advantage of database backup and failover strategies and policies already in place in the environment.

**Answer:** D

**QUESTION:** 66

Using the diagram below to install and configure Cognos 8 BI, which of the following components will NOT address automatic failover?

- A. Cognos 8 BI Content Manager (Active)
- B. Cognos 8 BI Content Manager (Passive)
- C. Cognos 8 BI Report Server
- D. Cognos 8 BI Gateway

**Answer:** D
