ProCurve Convergence

<http://killexams.com/pass4sure/exam-detail/HP0-791>

- B. dense-mode
- C. group-management
- D. protocol-independent

Answer: B

QUESTION: 53

Routing protocols such as RIPv2 and OSPF use multicast addresses in the _____.

- A. global scope
- B. local scope
- C. autonomous scope
- D. administrative scope

Answer: B

QUESTION: 54

Which address is valid for IP multicast?

- A. 198.54.19.4
- B. 229.17.83.9
- C. 241.16.17.2
- D. 220.18.34.5

Answer: B

QUESTION: 55

A router that does not support IP multicast receives a multicast transmission. The router handles the traffic as if it were a _____.

- A. unicast
- B. broadcast
- C. packet error
- D. router error

Answer: B

QUESTION: 56

A ProCurve 5308xl switch acts as the IGMP Querier for three networks. During a

multimedia transmission, the switch sends General Queries to all three networks. After the transmission ends, no multicast traffic is present on the networks. What will the switch do?

- A. stop sending queries until it detects a new multicast stream
- B. send queries only to networks that include other IGMP routers
- C. send queries directly to identified IGMP hosts
- D. continue sending periodic queries to all networks

Answer: D

QUESTION: 57

During a multicast transmission, a PIM-Dense router receives Leave Group messages from all downstream IGMP hosts that had requested the transmission. The router sends a PIM Prune message upstream and _____.

- A. queries PIM neighbors to determine if it should keep the multicast group's S,G pair in its PIM table
- B. immediately drops the multicast group's S,G pair from its PIM table
- C. maintains the multicast group's S,G pair in its PIM table as long as the stream is being transmitted
- D. drops the multicast group's S,G pair from its PIM table after the Holdtime expires

Answer: C

QUESTION: 58

Why does an IGMP host transmit a Host Membership Report? Select TWO.

- A. to respond to a query
- B. to initiate a group
- C. to identify the Querier
- D. to join a group
- E. to leave a group

Answer: A, D

QUESTION: 59

Analysis of an IGMP Host Membership Report shows that it contains a list of host addresses. What is the content of the list?

- A. all PIM-enabled routers between the host and the multicast source
- B. the sources from which the host will accept multicasts
- C. all known members of the multicast group on the host's own network
- D. all known sources of multicast traffic for the specified group

Answer: B

QUESTION: 60

When does a PIM-enabled router add an S,G pair to its PIM routing table?

- A. when it receives a PIM Graft message
- B. when it receives a multicast transmission
- C. when it receives a multicast advertisement
- D. when it receives a Hello message from a neighbor

Answer: B
