# HP0-J48

*Designing HP StorageWorks Solution*

<http://killexams.com/pass4sure/exam-detail/HP0-J48>

- B. business value
- C. value selling
- D. IT strategy values

**Answer:** B

**QUESTION:** 124

While discussing HP 3PAR products and services, a customer asks a question about the 3PAR Green Zone. What does the term 3PAR Green Zone refer to?

- A. power and cooling information of HP 3PAR products
- B. information used for positioning HP 3PAR products
- C. hardware and software compatibility matrix
- D. compliance information for HP 3PAR storage arrays

**Answer:** B

**QUESTION:** 125

Which storage interconnect component provides connectivity from a server to an FCoE switch?

- A. Network Interface Controller
- B. Host Bus Adapter
- C. Virtual Interface Controller
- D. Converged Network Adapter

**Answer:** D

**QUESTION:** 126

Which common connection standard is used to connect servers to NAS devices?

- A. GbE
- B. iSNS
- C. SATA
- D. FC-AL

**Answer:** A

**QUESTION:** 127

Which HP Storage solution provides consolidation to a single, unified storage pool that can serve files to clients and blocks to servers via multiple protocols?

- A. P2000
- B. X3000
- C. P4000
- D. X9000

**Answer:** B

**QUESTION:** 128

A customer's new business requires a flexible SAN solution, which can start at 20 device ports and grow up to 120 device ports in a single stack per fabric. It should also include network management and storage provisioning from a single screen. Which HP product line is the preferred solution?

- A. HP StorageWorks 8/80 SAN Switch
- B. HP StorageWorks DC04 SAN Director
- C. HP StorageWorks SN6000 8Gb Fibre Channel Switch
- D. Cisco MDS 9134 Multilayer Fabric Switch

**Answer:** C

**QUESTION:** 129

A customer, owning an HP EVA storage array, requests a solution that provides access to servers which do not require Fibre Channel performance to their block storage. Which product should be included in the solution?

- A. HP StorageWorks EVA iSCSI Connectivity Option
- B. HP StorageWorks Coarse Wave Division Multiplexing Solution
- C. HP StorageWorks 400 Multi-Protocol Router
- D. HP StorageWorks IP Distance Gateway

**Answer:** A

**QUESTION:** 130

In an initial meeting with a company, a consultant often uses the four Fundamental Storage Architecture Views to gain information to aid in designing a solution. Which information is gained from using the functional view questions?

- A. new IT management strategies
- B. how the new infrastructure will benefit the end users
- C. specific products and other solution components
- D. a view of the applications, interfaces and storage infrastructure

**Answer: B**

**QUESTION: 131**

A customer wants to transform their IT infrastructure to increase productivity, control costs and improve efficiency. One of the customer's goals is to improve storage capacity utilization, while consolidating SAN islands. In a first meeting, a consultant should present a roadmap to migrate the existing traditional storage environment into a virtualized server and storage infrastructure. Which storage consolidation and virtualization benefit should the consultant emphasize when presenting SAN Virtualization Services Platform (SVSP) advantages?

- A. It adds more storage capacity and expands virtual volumes.
- B. It defines a single namespace for easy management.
- C. It provides support for all major file protocols concurrently.
- D. It ensures that performance of the virtual volume is handled by a single array.

**Answer: A**

**QUESTION: 132**

The CIO of a regional banking company indicates that the bank needs to open a new data center to handle an increase in business and to properly protect the data of their customers. The existing data center servers are running an older version of Solaris on ProLiant. New servers at the new data center will run the latest version of Solaris on ProLiant. Data from the EVA storage array at the existing data center will be replicated to new storage. Which resource validates compatibility with server OS versions and storage arrays?

- A. SPOCK
- B. SalesBuilder
- C. SAN Validator
- D. SAN Design Guide

**Answer:** A

**QUESTION:** 133

What are key characteristics of a Cloud computing model? (Select two.)

- A. Platform as a Service
- B. thinly provisioned
- C. resource pooling
- D. defined network access
- E. on-demand self-service

**Answer:** C, E
