QUESTION: 96

What are features of Synchronous Long Distance replication? (Select two.)

- A. A single InServ can be the target for up to four source InServs.
- B. The remote InServ can be manually promoted to the role of primary for the specified volumes.
- C. A given Remote Copy group can be sent to two InServs simultaneously.
- D. It allows for synchronous mode to one target, periodic mode to the other.
- E. Replication to the remote site can use either IP-based or FC-based communication.

Answer: C, D

QUESTION: 97

A consultant creates a virtual domain. Which user class is necessary to perform this task?

- A. Browse
- B. Edit
- C. Super
- D. Service

Answer: C

QUESTION: 98

When should you use Dynamic Optimization with thin provisioned virtual volumes?

- A. before growing a thin provisioned virtual volume, to ensure balanced growth
- B. prior to adding a new drive chassis, to ensure the disk usage is equal
- C. prior to adding a controller node, to ensure a balanced environment
- D. after adding controller nodes, to balance the load across all nodes

Answer: D

QUESTION: 99

The HP 3PAR array is a virtualized storage system ideally suited for multi-tenancy. What is the functionality of multi-tenancy?

- A. granular distribution per disk group with automated load balancing
- B. distribution of the data on RAID sets known as concatenation of RAID sets
- C. secure separation of storage, while maintaining the advantages of massive parallelism
- D. multiple arrays configured to appear as a single presentation

Answer: C

QUESTION: 100

After implementing an HP 3PAR system, a system engineer performs a customer orientation session and demonstrates how to create a RAID 6 volume, explaining the cage high availability aspects. In a RAID 6 (6+2) volume, what is the minimum number of chunklets per cage if four cages are configured?

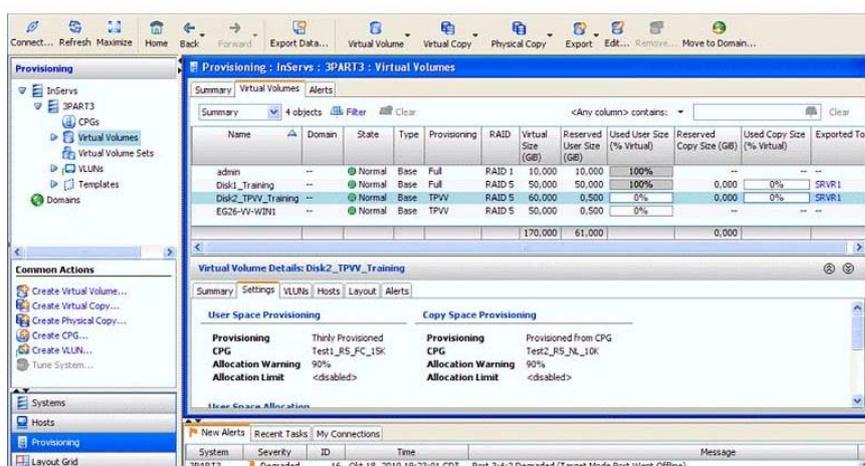

- A. 1
- B. 2
- C. 4
- D. 8

Answer: B

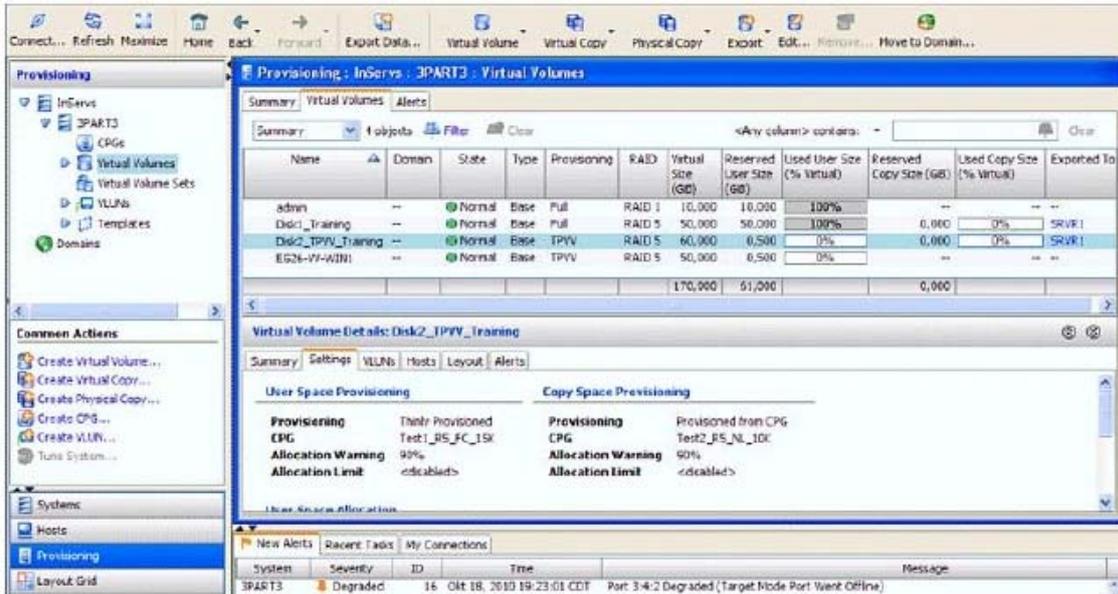

QUESTION: 101

HOTSPOT

Click on the button used to view the virtual volume settings for zero detect with a thin provisioned virtual volume in the InForm Management Console.

Answer:

QUESTION: 102

What is the maximum number of initiators that can access a single HP 3PAR storage array?

- A. 64
- B. 256
- C. 512
- D. 1024

Answer: D

QUESTION: 103

When sizing a system to run the System Reporter tool, which resource should be consulted before installation to determine database sizing?

- A. System Reporter release notes
- B. 3PAR Design Guide
- C. 3PAR Tuning spreadsheet
- D. System Reporter CD sizing sheet

Answer: D

QUESTION: 104

What is indicated when the Node Status LED of an F-Class controller node is flashing amber?

- A. ready for removal
- B. joining cluster
- C. P/S, fan or battery failure
- D. hardware error

Answer: C

QUESTION: 105

In an HP 3PAR Remote Copy Many-to-One topology, what is the maximum number of arrays that can replicate bi-directionally?

- A. 1
- B. 2
- C. 4
- D. 6

Answer: B

QUESTION: 106

Which actions are recommended prior to removing a domain? (Select two.)

- A. disable domain access using the CLI
- B. revoke super user privileges
- C. remove all objects
- D. disable domain access using the InForm Management Console (IMC)
- E. revoke user privileges

Answer: C, E
